Cataloguer's remarks: dots between words, R's in Warrey look like the letter Y, the letter U looks like V, many long S's, 0 in 1750 looks like backwards 6. The story regarding the carving above the epitaph is as follows: David Warrey died when he was surprised by a native American. The carver depicted this with an Indian face on the stone. The same carver is responsible for other stones in the cemetery, including Jane Hathorn's and Phillip Tanner's.
