

Sharps Meeting June 22, 2024

Attendees: Tom Swan, Jerry Hendricks, Pam Goffinet, Aimee Martin, Mary Voshell. – Recording Secretary

Tom sold a single lot to Kathryn and Clifford Houston, center section row 22 lot 3 north. Documentation was amended to remove reference to ownership of the land and state the transaction is for the right to interment.

Billy Lloyd and sons completed the cleaning and repair work on the Beaudett, Kerr, Williams and Cann stones on June 19th. Before and after photos were presented for review. The invoice total was \$2,660.80 which did not include charges for information he shared regarding additional leaning stones that were deemed not to be in immediate danger of damage. We will keep an eye on these. He shared knowledge on procedures determining the type of stones and how best to clean them. He also provided tips on how we can fix some of the smaller monuments and cornerstones that are leaning or sinking ourselves.

Mary will provide photos of the Williams stones, before and after via text to Tom so that he may share them with the family who had contacted him regarding the leaning stones.

Jerry received a request via the website from park ranger Leslie Leader about the possibility of installing reflectors on the iron fence so deer could better see it when jumping over. Apparently there had been a deer impaled on the fence that had to be destroyed and removed. No one on the board had ever heard of this happening before. All agreed that more discussion is needed on this topic and what if anything can be done. Pam will contact Leslie for additional discussion and schedule a meeting with her for all if necessary.

Pam received a compliment on the website and how well done it is from the park employee she spoke to. Thanks to Jerry for that. It was agreed that we should include information about green burials since we opened the north meadow for this purpose. Mary will research and provide some information and possible links that can be added to the website on this topic.

Next Meeting Monday July 22 @ 7pm

Before and After Cemetery Repairs June 2024

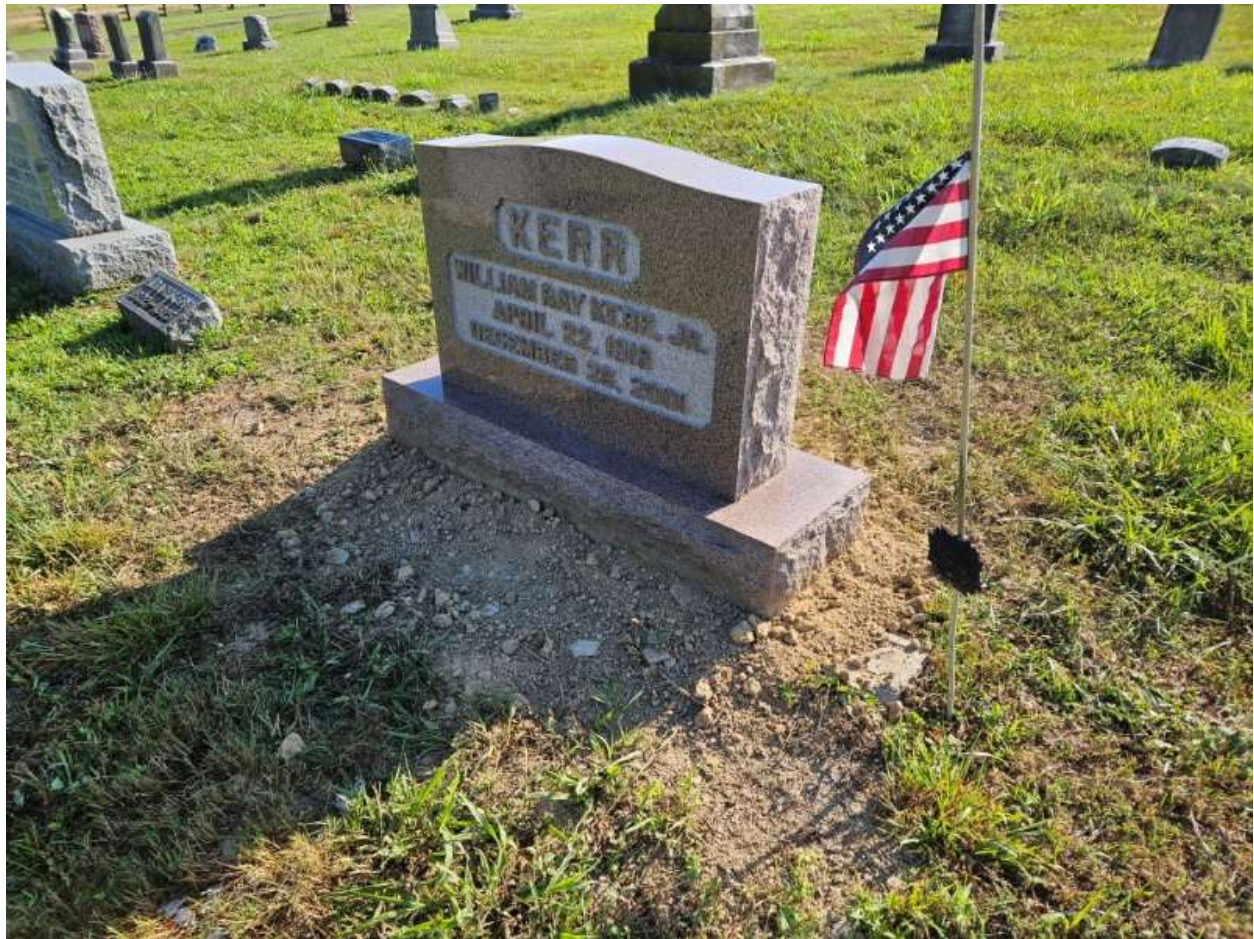

Beaudett Row 9 Lot 24

Existing foundation was crumbling cinder block no longer supporting the stone – ground deteriorated due to erosion and critter (field mice or moles) infestation – stone and base removed and cleaned, new footer poured down to vault and stone cleaned and reset

Kerr Row 13 Lot 10

Existing foundation was crumbling unable to support the weight, stone and base removed and cleaned old footer pulled and new footer poured down to vault, base reset and stone cleaned and replaced

Williams Row 14 Lots 2 and 3

Existing foundation was blocks not providing adequate support causing stones to lean forward due to erosion stones were removed, foundation was capped with new concrete to support and straightened stones cleaned and replaced

Gilber and Carrie Cann Row 13 Lot 7

Cleaned only
